Why teak?

Teak (*Tectona*) is one of the most legendary tropical hardwoods in the world, known for its strength and long life. Here is why we chose it as our main material.

1

Weather resistant

Teak heartwood contains natural oils that repel water and protect the wood from decay, insects, and bacteria. Ideal for permanent placement in gardens, by the pool, or on cruise ship decks.

2

Timeless beauty

Its colour ranges from warm brown to gold, with a natural glow that lasts even after years outdoors. The dense grain gives a luxurious look that moulded plastic cannot copy.

3

Strong yet flexible

Dense but not brittle, so our craftsmen on Java can carve every piece in fine detail.

4

Easy to maintain

Teak does not turn brittle over time and needs no chemical preservative. An occasional polish or coat of varnish brings out the grain even more.

5

Investment value

The best wood comes from trees up to 40 years old. Supply is limited while world demand keeps rising, which makes a teak set a valuable collectible.
